

# The Construction (Design & Management) Regulations 2007

## CDM2007 Update Briefing

### 1/2 Day Course

This course is designed to provide clients, project managers, designers, principal contractors and contractors with a briefing on the differences between the CDM Regulations 1994 and the CDM Regulations 2007.

**This course is NOT suitable for delegates who have limited knowledge of CDM 1994, nor does it provide detailed information on site health and safety management and control. CDM co-ordinators would normally require more specific training than is provided by this course. Other courses are available.**

#### **Session 1 Introduction and setting course objectives**

#### **Session 2 CDM Application**

Review of the differences between the applications of the Construction (Design & Management) Regulations 1994 and 2007. The format and content of the 2007 regulations, ACoP and guidances.

#### **Session 3 The Client**

Comparison of the 1994 duties of the client with the 2007 duties; including management, appointments, the client's agent, etc.

#### **Session 4 The Designers**

Current versus new requirements of the design and the designer to eliminate and reduce health and safety risks by design. The provision of information and liaison with the CDM co-ordinator and other designers.

#### **Session 5 The Planning Supervisor/CDM Co-ordinator**

The differences between the planning supervisor's duties and responsibilities and the CDM co-ordinator's duties and responsibilities. The health and safety file.

#### **Session 6 The Principal Contractor/Contractors**

The requirements on the principal contractor and other contractors.

#### **Session 7 The Health and Safety Plans/Pre-construction Information**

The pre-tender health and safety plan versus the pre-construction information. The construction phase plan requirements.

#### **Session 8 Course Review and Close**

#### **Objectives**

On completion of the course, delegates should:

- be familiar with the changes to CDM regulations and the associated Approved Code of Practice;
- appreciate the impact the changes will have on the management of construction projects during design and construction phases.

**Maximum number of delegates: 16**
